Dear Friend and Colleague,

we have the pleasure to invite you to the International Yeast Model Convention 2010, a tribute to Piotr Slonimski, to be held at Sapienza University of Rome, on 22-25 September 2010.

The Conference will provide a comprehensive update of yeast biology and its use as a tool and model organism for understanding cellular and molecular processes of eukaryotes. Topics covered range from the fundamentals of yeast biology such as cell structure, biochemistry, genetics and signaling, to current approaches and applications such as metabolomics, disease models and uses in biotechnology. For more details visit the website <http://w3.uniroma1.it/yeastmodel2010/>. Please kindly advertise this meeting by displaying the attached poster to your colleagues.

Should you need additional information, do not hesitate to contact us [yeastmeeting@uniroma1.it](mailto:yeastmeeting@uniroma1.it).

We look forward to welcome you in Roma.

Kind regards,

Rodolfo Negri
