

Post-Doctoral Fellowship available

A **three-year post-doctoral position** is available in the laboratory of Dr. Sirio Dupont in the Department of Molecular Medicine of the University of Padova to study new regulatory mechanisms of metabolism and their relevance for cancer metastasis, funded by a Worldwide Cancer Research grant.

The current research of the lab is focused on mechanotransduction and how this regulates signaling and metabolism. The ideal candidate should have a PhD in the field of molecular biology, cell biology or metabolism and relevant publications. A strong background in cell culture and imaging techniques is requested.

Enquiries and applications can be sent to **sirio.dupont@unipd.it** explaining why you are interested in joining the lab, including a CV with a brief research synopsis, and contact information for 2 references (name, address, email and phone number).

Closing date: April 30 2021.
