

Catania, November 27th Aula Magna - Torre Biologica

THE OUTER MITOCHONDRIAL MEMBRANE: BIOGENESIS AND FUNCTIONS AT THE INTERFACE BETWEEN THE ORGANELLE AND THE CYTOSOL

PROGRAM

- h. 9:00 Introductory remarks:**
Prof. Francesco Basile, Rector of University of Catania,
Prof. Filippo Drago, Director of Biometec,
Prof. Vito De Pinto, SIBBM organizer
- h. 9:30 "Biogenesis of mitochondrial outer membrane proteins in evolutionary context"**
Prof. Doron Rapaport
Interfaculty Institute for Biochemistry, University of Tübingen, Germany
- h. 10:15 "Import pathways of mitochondrial tail-anchored proteins"**
Daniela Vitali (PhD student)
Interfaculty Institute for Biochemistry, University of Tübingen, Germany
- h. 10:45 "The two porin channels of *S. cerevisiae* mitochondrial: an example of coordinated functions?"**
Dr. Andrea Magrì (Post-Doc)
Dept. of Biomedical and Biotechnological Sciences, University of Catania
- h. 11:15 Coffee break**
- h. 11:45 "Cell Signalling Regulation by the Outer Mitochondrial Membrane Protein TSPO"**
Prof. Michelangelo Campanella
Mitochondrial Cell Biology and Pharmacology Research Unit - RVC Department of Comparative Biomedical Sciences, UCL, University of London, UK
- h. 12:30 "Translational control of the alternative *D. melanogaster* VDAC1 mRNAs"**
Prof. Angela Messina
Dept. of Biological, Geological and Environmental Sciences, University of Catania
