

## Post-doctoral position Department of Biotechnology and Life Sciences University of Insubria (Busto Arsizio – VA).

In the laboratory of Prof. Bonapace at the Department of Biotechnology and Life Sciences University of Insubria a Post-Doctoral position is available for the study of the role of new molecular determinants in the cross-talk between prostate cancer cells (PCa) and cells of the tumor microenvironment. This project will integrate proteomic (in collaboration), cell biology and gene expression regulation approaches.

### Qualification

The candidates must have a Master's Degree in bio-medical disciplines and, preferably, a PhD in Molecular Biology, Experimental Medicine or in related disciplines. A broad knowledge and proven laboratory experience in cellular and molecular biology techniques is required, including gene transfection and silencing techniques. Experience and competency in flow cytometry would be a preferential title for the candidate.

### Location of the research activity

The research activity will be conducted at the Laboratory of Tumoural Epigenetics of the Department of Biotechnology and Life Sciences of the University of Insubria in Busto Arsizio (VA), in collaboration with other research groups at the "Magna Grecia" University of Catanzaro (proteomics) and the IRCCS MultiMedica of Milan.

### Terms of salary and employment

A 12-month "*Assegno di Ricerca*" will be established. The salary will be according to the national law for these contracts (*art. 22, Legge 30 dicembre 2010, n. 240*).

### Contacts

Applications including a cover letter and curriculum vitae should be sent to: Prof. Ian Marc Bonapace.
