

UNIVERSITÀ DEGLI STUDI DI MILANO
FACOLTÀ DI MEDICINA E CHIRURGIA

Dipartimento di Biotecnologie Mediche e Medicina Traslaazionale

Milan, 28.10.22

A one-year fellowship research position on the project entitled “The lncRNA *PHOX2B-ASI* in the pathogenesis and as potential drug target in Congenital Central Hypoventilation Syndrome (CCHS)” founded by the CCHS Foundation, is available at the laboratory of “Molecular Pharmacology”, Dept. of Medical Biotechnology and Translational Medicine of the University of Milan. The starting date is January, 1st, 2023.

This person will join a group working on CCHS syndrome, a life-threatening disorders affecting the Autonomic Nervous System and central chemosensitivity, caused by mutations in the *PHOX2B* gene. The project aims at assessing molecular mechanisms of CCHS pathogenesis by means of healthy and disease-derived iPSCs.

We are seeking for a dynamic and highly motivated research fellow at pre-doctoral stage with a Master’s degree in Biological Sciences, Biotechnology or Pharmaceutical Sciences. Good practice in cellular and molecular biology technologies and experience with cell culture is a requisite for applying to this position. Experience with pluripotent stem cell culture will be considered a plus.

Competitive salary will be offered based on the experience of the candidate. Each applicant should submit a full CV with a detailed description of her/his background and expertise together with contacts for recommendations.

Enquires should be sent to:

Diego Fornasari – diego.fornasari@unimi.it

and/or Simona Di Lascio – simona.dilascio@unimi.it
